FLEXIBILITY

Concept Bridge stands for functionality, integration and modern solutions. All ships have different needs. We entail turnkey delivery of complete bridge solutions for the future, tailor-made to meet customer requirements as long as they are within the limits of the IMO/SOLAS, class rules and regulations.

COMPETENCE

The requirements on a bridge are stringent, not least with respect to where equipment is placed and the angle and field of vision from the bridge. Our long and productive experience of working with ships' captains has taught us to place bridge equipment with focus on functionality, service and maintenance.

FUNCTIONALITY

The essence of Norwegian Concept Bridge is functionality, integration and modern solutions. Norwegian Control Systems entail bridge solutions for the future, tailor-made to meet customers' requirements. We deliver in-house designed consoles that is flexible in a modular based system. We have focused on the installation onboard the vessel as well as the esthetics.

FOR EVERYONE

As a part of the Concept Bridge we deliver complete NavCom systems for all kind of vessels. Our collaborating partners is the most recognized manufacturers world wide, such as Furuno, Anschutz, Sperry, JRC etc.
